Subject: Floating Point SQG Files
Date: 01/05/2010 09:19 AM

Eric and Burt-

In order to finish the review of the Portland Harbor SQGs, we need the floating point files from the EPA 2009 model. The LWG submitted the files we need, but for the original "draft BERA" model – their recommended model. We won't have the resources to re-analyze the hit / no hit distributions using the new reference envelope definitions. They should submit the same files they did last time, only for the EPA 2009 model. This should include model runs for each individual endpoint, including *Hyalella* biomass. The "Reanalysis Memo" excluded this endpoint from the final EPA 2009 model results.

Thanks,

Jennifer
